CALIFORNIA HISPANIC VOTER POLL

HOW THE POLL WAS CONDUCTED

This poll was conducted by Mason-Dixon Polling & Research, Inc. of Jacksonville, Florida from September 21 through September 24, 2026. A total of 400 registered Hispanic California voters were interviewed live by telephone statewide. All indicated they were likely to vote in the November 2026 general election.

Those interviewed were selected randomly from a telephone-matched California voter registration list that included both land line and cell phone numbers. Quotas were assigned to reflect voter turnout by county.

The margin for error, according to standards customarily used by statisticians, is no more than ± 5 percentage points. This means that there is a 95 percent probability that the "true" figure would fall within that range if all voters were surveyed. The margin for error is higher for any subgroup, such as a gender or age grouping.

QUESTION: Do you approve or disapprove of the job performance of Donald Trump as president?
